  Beacon, Core Data, Core Location, jQuery, Bootstrap, REST API, Firebase, Git

Education

Southern Adventist University (SAU)   *May 2020*
  • B.Sc. Computer Science, 3.74 GPA
  • CRLA Tutor Certification Level 2
      ◦ 7 Math and CS courses.

Experience

iOS Developer Intern, SAU   *Mar 2018 – May 2020*

  • Designed, implemented, tested, and released our **University official app**.
  • Added iBeacon, Push Notifications, Location Services.
  • Built a C# Web Service to offload business logic from the client-side.
  • Added REST API communication.

Android Developer Intern, SAU   *Jan – Dec 2017*

  • Built from scratch **Adventist Giving app** (single-developer app).
  • Designed the app for users to select and make donations to Christian churches in North America.
  • Utilized Retrofit for network requests.
  • 10k+ downloads and 50+ 5-star reviews on Google Play.

Personal Projects

Laboratory - Open-source iOS app   *May 2019 - present*
  • For scientific professionals to manage labs and equipment collaboratively.
  • Swift, MVVM, CocoaPods, FBSnapshotTestCase, and Firebase SDKs.

eBuy - .NET Web app   *April 2019*
  • A sample e-commerce platform.
  • SQL, jQuery, Bootstrap, Dapper.

Trvlr - Open-source iOS app   *Aug 2018*
  • Collected open-source JSON data about travel destinations and built a travel guide iOS app.
  • Swift, MVC, UIKit, and Auto Layout.

Volunteering

  • Helped build an event planning website for local churches, using PHP and Yii2 framework (20 hours).
  • Instructed 8 fifth graders, at AW Spalding School, in building robots for the FIRST LEGO League (4 months).
  • Prepared music and food to serve nearly 50 homeless people at Chattanooga Community Kitchen.
